TEST SCENARIOS FOR CUSTOMER LOGIN - BAJAJ BANKING APPLICATION				
Scenario ID	Scenario Name	Scenario Description	Preconditions	Expected Outcome
TS_01	Successful Login Using Mobile Number	When the customer enters a valid mobile number and a correct password then the customer logs in successfully and the customer is redirected to the dashboard	Given the customer is registered and has an active account.	Then the customer is logged in successfully And the customer is redirected to the dashboard
TS_02	Successful Login Using Customer ID	When the customer enters a valid Customer ID and a correct password then the customer logs in successfully and the customer is redirected to the dashboard	Given the customer is registered and has an active account.	Then the customer is logged in successfully And the customer is redirected to the dashboard
TS_03	Successful Login Using Email ID	When the customer enters a registered email ID and a correct password then the customer logs in successfully and the customer is redirected to the dashboard	Given the customer is registered and has an active account.	Then the customer is logged in successfully And the customer is redirected to the dashboard
TS_04	Successful OTP Verification During Login	When the customer enters valid login credentials and receives an OTP, then enters the correct OTP then the OTP is verified successfully and the customer is redirected to the dashboard	Given the customer has entered valid login credentials and an OTP has been sent.	Then the OTP is verified successfully And the customer is redirected to the dashboard
TS_05	Successful Login After Password Reset	When the customer enters the registered mobile number and the new password after resetting it then the customer logs in successfully and the customer is redirected to the dashboard	Given the customer has successfully reset the forgotten password.	Then the customer is authenticated successfully using the new password And the customer is redirected to the dashboard
TS_06	Login With Unregistered Mobile Number	When the customer enters a mobile number that is not registered then the system displays an error stating the mobile number or Customer ID is invalid and the login attempt does not proceed	Given the customer is on the Login screen.	Then the system displays an invalid mobile number/Customer ID error And the login is not completed
TS_07	Login With Incorrect Password	When the customer enters a registered mobile number and an incorrect password then the system displays an error stating the password is incorrect and the login attempt does not proceed	Given the customer is registered and on the Login screen.	Then the system displays an incorrect password error And the login is not completed
TS_08	Login With Invalid or Expired OTP	When the customer enters an invalid or expired OTP then the system displays an error stating the OTP is invalid or expired and the login attempt does not proceed	Given the customer has entered valid login credentials and an OTP has been sent.	Then the system displays an invalid/expired OTP error And the login is not completed
TS_09	Login With Mandatory Fields Blank	When the customer leaves the Mobile Number/Customer ID or Password field blank then the system displays validation errors for the blank mandatory fields and the login attempt does not proceed	Given the customer is on the Login screen.	Then the system displays validation errors for the blank fields And the login is not completed
TS_10	Login Attempt With a Locked Account	When the customer attempts to log in using the credentials of a locked account then the system displays an error stating the account is temporarily locked and the login attempt does not proceed	Given the customer account has been temporarily locked.	Then the system displays an account locked error And the login is not completed
TS_11	Account Lock After Exceeding Failed Login Attempts	When the customer enters incorrect credentials repeatedly beyond the allowed attempt limit then the system locks the account and displays an error stating the maximum failed attempts are exceeded	Given the customer has entered incorrect credentials multiple times.	Then the system locks the account And displays a maximum failed attempts error
TS_12	Login Attempt With an Inactive Account	When the customer attempts to log in using the credentials of an inactive account then the system displays an error stating the user account is inactive and the login attempt does not proceed	Given the customer account status is inactive.	Then the system displays an inactive account error And the login is not completed
