TEST SCENARIOS FOR HOLLAND & BARRETT.COM				
Scenario ID	Scenario Name	Scenario Description	Preconditions	Expected Outcome/Output
TS_01	Verify user registration	Check that a first-time visitor can create a new account by entering valid personal details.	The visitor doesn't already have an account.	A new account is created and a confirmation message is shown to the user.
TS_02	Verify user login	Check that an existing user can sign in using a valid email/username and password.	The user already has a registered account.	The user is authenticated and taken to the Home page.
TS_03	Verify product search	Check that searching for "Vegan Chocolate" returns the expected results.	The user is already logged into the site.	A list of matching vegan chocolate products is displayed on the results page.
TS_04	Verify product filters	Check that the user can narrow down results using filters such as Brand, Price Range, and Dietary Preference.	The search results page is already displayed.	Only items matching the selected filter criteria remain visible.
TS_05	Verify product details	Check that selecting a product from the results opens its details page with accurate content.	The product search results are currently visible.	The details page loads with the correct price, images, ingredients, and description for that item.
TS_06	Verify add to basket	Check that a product can be added to the shopping basket from its details page.	The user is viewing a product's details page.	The selected item is added to the basket without any errors.
TS_07	Verify update basket quantity	Check that the user can increase or decrease the quantity of an item already in the basket.	At least one product has already been added to the basket.	The item count and basket total both update to reflect the new quantity.
TS_08	Verify remove product from basket	Check that a product can be removed from the basket once it's no longer needed.	The basket currently holds one or more items.	The selected item disappears from the basket and the basket view refreshes accordingly.
TS_09	Verify checkout process	Check that the user can move from the basket screen into the checkout flow.	The basket contains at least one item.	The user is taken to the checkout page without any issues.
TS_10	Verify order confirmation	Check that an order can be completed once shipping and payment details have been entered at checkout.	The user is on the checkout page with valid shipping and payment details filled in.	The order goes through successfully and a confirmation message/order summary is displayed.
